

Talking Trash

In Carteret, Craven and Pamlico Counties

Volume 13 Issue 3

Our Board of Directors

Summer 2013

Our Mission

The Coastal Environmental Partnership's mission is to produce a cleaner, safer and healthier environment by providing, operating and managing an economically and technically sound municipal solid waste management system for the citizens of Carteret, Craven and Pamlico counties.

Did You Know...?

...The Recycling Symbol is 43 years old.

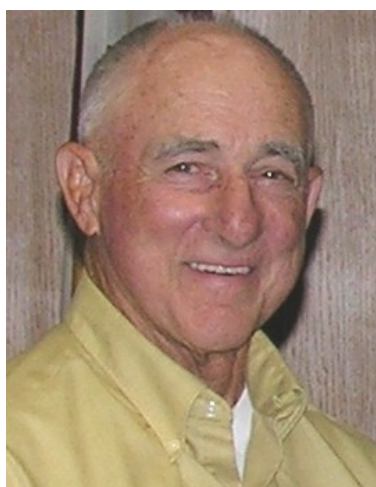

...In 2012, 16,362 NC Big Sweep Volunteers picked up 75,394 pounds of trash from North Carolina's waterways.

...The 2012 Ocean Conservancy International Coastal Cleanup again identified cigarette butts as the number one most littered item, representing 32% of all debris counted.

As an on-going feature, we will highlight The Board Members of the Coastal Environmental Partnership. The Board members are appointed by the Boards of Commissioners from our member Counties. Two board members are appointed from Carteret County,

Mr. Clark Wylde, Chair, Carteret County

Mr. Wylde joined the Board in January 2002 after serving several years as the municipal representative for the Town of Emerald Isle. In 2004, Mr. Wylde sold his home and business in Emerald Isle and moved to the Town of Newport. He still works part-time for his former business and enjoys bass fishing. Mr. Wylde was elected Vice-Chairman in January, 2007 and elected Chairman in January, 2013.

Mr. Clark Wylde

Mr. Doug Brinson, Vice Chair, Pamlico County

Mr. Doug Brinson

Mr. Brinson joined the board in 2003 having been involved with the formation of the Coastal Environmental Partnership and as a Pamlico County Commissioner. Doug served four terms as a commissioner after having served two terms on the Pamlico County Board of Education. After graduating from Atlantic Christian College with degrees in history and psychology, Doug taught at Sanderson High School in Raleigh. He then went on to become a special agent with the North Carolina State Bureau of Investigation. After retiring from the SBI he returned to Pamlico County to take over the family farming operation in Arapahoe.

Bobby Darden
Executive Director

Landfill Rates

The Coastal Environmental Partnership begins its 20th year operations later this year. Since our modest beginning in 1993, we've handled and disposed over 7 billion pounds of solid waste for the citizens of Carteret, Craven, and Pamlico Counties. Our overall priorities that have been established over these 20 years remain in focus for the coming fiscal year. These priorities are: 1) fiscal responsibility to the citizens of the member counties, 2) environmental responsibility for our operations, and 3) service responsibility to our customers.

With these priorities in mind, beginning July 1, 2013, CEP implemented a tipping fee increase of \$2 per ton at all of our facilities. Even with this nominal increase, our tipping fees remain below State averages, and well below the averages for facilities located in Eastern North Carolina, which are confronted with more transportation and environmental challenges.

The Board and staff at the Coastal Environmental Partnership have to plan our facilities years in advance. The increase is part of this careful planning process, and should allow the CEP to fund the next construction phase of the landfill in another 6 to 7 years. The increase will also allow CEP to continue to develop landfill space to serve the region for approximately 25 years at this location, with enough available land to serve the region for decades after that.

With the average person in our region generating one ton of solid waste in a year, the increase equates to an annual increase of about \$2 for the average person for their solid waste disposal. That's a very modest amount to continue to provide an important infrastructure to the citizens that

A Source For a Different Cover

Every afternoon at the Tuscarora Landfill all of the garbage disposed of for the day is covered with 6 inches of dirt. This practice helps prevent litter and odor leaving the landfill site and reduces the number of intruding vermin.

We recently implemented a new method of cover—Posi-Shell®. Posi-Shell® is a spray-applied mineral mortar coating, similar to stucco, that can be used for landfill daily cover, intermediate cover, erosion prevention, and odor control. Imagine pouring chocolate syrup on ice cream and then the chocolate hardens like a shell. You've got the idea.

Spraying the liquid material on the garbage

Material after solidifying overnight

RATES

Effective July 1, 2013– June 30, 2014

Tuscarora Regional Landfill (Permit 25-09) Tuscarora (252-633-1564)

Hours: Monday – Friday 7:30 AM – 4:30 PM; Saturday 7:30 AM – 2:00 PM
